
What are the best action/shooter games.

I just recently got a PS3 and the only game I have is Call of Duty: Modern Warfare 2. I was looking into getting new games and I know of some good ones but I need some other ideas too. I was wondering what the top rated action/shooter type games are (in your opinion). Top 10 would be good and if you have played any of them please describe what you like most about them. Also, what are some high expectation games that will be coming out in the future. Please let me know! Thanks!
